**Introductory Aviation Education Programme - VR Flight Simulation**  
**Task Force Recruitment**

The AE&D Group is pleased to announce that a new aviation programme will be developed and offered to younger members of the Corps and the general public as part of the Hong Kong Jockey Club's "*Badges: Preparing Tomorrow's Leaders*" programme and funding.

In order to ensure the smooth preparation, efficient operations, and effective delivery of the programme, we will be forming a dedicated task force. We warmly invite individuals who possess a strong passion for aviation and flight simulation to actively participate in this task force as a secondary duty.

For cadet members, specific aspects of the service conducted as part of the task force will be recognised as *community service records*, subject to Community Service Squadron's final approval. This offers an excellent opportunity for cadets to contribute towards their community while actively engaging in this meaningful aviation programme.

Eligibility:

Current members:

- Above the rank of Cpl;
- Who have prior experience in any aviation courses or flying / flight simulation training;
- Who are interested in flight simulation and delivering theory classes.

Main Duties:

- To assist in flight simulation hardware/software procurement, set-up and maintenance;
- To assist in delivering flight simulation experience to programme participants;
- To assist in developing teaching material;
- To provide logistics support for the programme.

Qualified Aviation Instructors (QAI) and members who wish to apply for the next QAIC are highly encouraged to join us. Reserved members are also welcomed to express their interest, while their participation is subjected to reactivation approval.

Interested members may obtain consent from their respective OC Units and contact Programme OIC Flt Lt Mike Y CHEUNG at [mike.cheung@aircadets.org.hk](mailto:mike.cheung@aircadets.org.hk). Application is open throughout the duration of the programme and will still be considered on a case-by-case basis.
